

Top 5 reasons to automate:

#1 Savings

The most beneficial impact an automation system will have is on your electricity bills. No longer will you be spending money for household appliances left on in your family's absence.

#2 Safety

You have the ability to control the small appliances with the simple tap of your finger on your smart device. You'll never have to worry about leaving the iron on again!

#3 Security

You can make sure no unwelcome guests arrive unbeknownst to you or your family anywhere in the world. This provides you with total peace of mind.

#4 Entertainment

Home Automation turns your entire house into an entertainment space. Setup a home theatre theme to close blinds, dim lights, turn on surround sound, lower your projection screen; all with the touch of one button.

#5 Comfort

Don't want to come home to a cold house? Simply adjust the thermostat from the convenience of your office a few hours before heading home.

*Come in and visit our **SMARTCENTRE** or enjoy an online tour showcasing all the latest technologies and energy efficiency solutions to improve your family's lifestyle.*

Home Automation

Enhance your level of comfort and lifestyle at home by taking advantage of modern technology. Our automation systems can be individually programmed to suit your needs, providing you ease of control via any web-enabled smart device.

Security, CCTV, & Access Control

If you are looking for peace of mind away from your home, we have a solution to suit you. We only stock reputable brands to ensure you have confidence in your security system. Access your CCTV cameras via your phone to check in on your house or even your dog in the backyard.

Smart Technologies

Most of us now use some form of smartphone or tablet at home. Well why not also use these devices to control your security, heating and cooling, lighting, blinds and home theatre? Use the latest smart technologies to enhance your day-to-day lifestyle.

Audio, Visual & Home Theatre

We can set you up with a simple iPad dock, a bluetooth controlled music system or a full blown home theatre room. Our multi-room audio devices are very popular, allowing you easy control of music in your bedroom, kitchen, lounge or alfresco.
