

THE LOCATION:
BAMSTONE FACTORY, PORT FAIRY, VIC

UNVEILED BY (L-R):
MR ANTHONY HOWARD QC,
THE HON. LINDA DESSAU AC
(GOVERNOR OF VICTORIA) &
BEN SMALL BM MIDDY'S WARRNAMBOOL

Bamstone

GREEN ENERGY SOLAR INSTALLATION

Bamstone is Australia's largest stone processing facility, based in Port Fairy. With rising energy tariffs a concern, Bamstone took a proactive approach in reducing costs by committing to a three stage Green Energy program. The core goal was to substantially lower the carbon footprint of the main processing plant. Working with Middy's Warrnambool, the TechEnergy team proposed an LED Lighting upgrade and installed a 100 Kilowatt+ solar panel system on the factory's roof space resulting in approximately 35% of Bamstone's Factory being supplied by Green Energy. The Middy's TechEnergy solution aimed to maximise Bamstone's return on investment and provide an effective energy cost reduction strategy.

- ▶ On-site installation of over **100 Kilowatts of Solar Panels**
- ▶ **Approx. 35%** of factory now supplied by **Green Energy**
- ▶ Significant **cost savings & offsets** to power price increases

THE INSTALL:

100kW+

OF SOLAR PANELS

“

The installation of the Solar Green Energy panels marks an exciting new era of innovation for Bamstone. It's a project that we are really proud of and hope that other local and regional businesses will be inspired by our adoption of sustainable energy. The Middy's TechEnergy team was pro active, had excellent communication and feedback and were extremely professional. The installation was well co-ordinated with a major focus on job safety. We are very satisfied with Middy's and the end result.

”

Michael Steel CEO, BAM Group
